

Kolectiv Bio

London based production trio. Kolectiv, consisting of Kalm, Carera and Keza have been honing their sound and direction since they formed in 2011. Since their Scientia Recordings debut their forward thinking approach to production and in particular the drum and bass sound has earned them recognition from household labels such as Dispatch Records, Citrus Recordings, Vandal Records and Flexout Audio as well as younger outfits like Diffrent Music, Plasma Audio and Ronin Audio.

One third of the group, Kalm, also co-runs the Nurtured Beatz imprint, which has released work by Kolectiv and counts them among the residents for its Nurtured Beatz parties held at Plan B in Brixton.

Support for their production has been widespread with the group counting support from the likes of Noisia, Xtrah, Zero T and DLR. The boys have also been invited to create remixes for BBE, alongside Chimpo, Citrus Recordings, and the list goes on.

There's no signs of Kolectiv slowing down either. Dispatch Records recently released a Kolectiv collaboration alongside Hyroglyphics, which broke into the top of the weekly charts online. They have productions forthcoming with Dispatch, Plasma, Vandal, Promixity and Ronin as well as collaborations to look out for with Philth, Bredren, Hyroglyphics, Hydro and more.
